Fortinet FortiManager SD-Branch Workshop

For professionals deploying Fortinet's SD-Branch solution utilising SD-WAN and Zero Touch Provisioning with FortiManager

Benefits of Fortinet Workshops with Wavelink

Certified trainers with in-depth product knowledge and proven instructional capabilities

Courses catering to a wide range of audiences, from beginners to professionals

Fortinet NSE training labs supplemented by product-based demos

Private on-site training events and FortiGate Immersion lab available on request*

*Minimum student requirements apply.

Why FortiManager SD-Branch

In this workshop, we'll introduce the concept of Software-Defined Wide Area Networking (SD-WAN) and demonstrate how Fortinet's SD-WAN solution, managed via FortiManager, can streamline network operations, enhance performance and reliability, and cut costs.

The course prepares you for select topics of the NSE 6 FortiManager Administrator exam. However, additional study is necessary for other topics included in the certification course. Successfully passing the exam will earn you the corresponding exam badge.

This course is part of the Network Security certification solution pillar.

NSE 6 CERTIFIED
SECURE NETWORKING
FORTINET

Course Content

- The fundamental concepts of SD-WAN and its SD-Branch companion, including their architectures, components, and deployment models.
- The concept of Zero-Touch Provisioning which enables the automated provisioning and configuration of SD-WAN devices, making deployment and management much easier and more efficient.
- The benefits of using SD-WAN, such as increased network agility, improved application performance, and better security.
- Fortinet's SD-WAN solution and its features, including centralised management and analytics, dynamic path selection, and application-aware routing.
- How to configure and deploy Fortinet's SD-WAN solution in a simulated network environment.
- Best practices for designing and managing an SD-WAN deployment.

By the end of the workshop, you'll have a solid understanding of SD-WAN/ SD-Branch and Fortinet's solution, as well as the knowledge and skills needed to design, deploy, and manage an SD-WAN/SD-Branch network utilising FortiManager.

Who Should Attend

The workshop is designed for network engineers and administrators who have a basic knowledge of FortiGate (FortiOS) and FortiManager.

Whether you're just starting to explore SD-WAN or you're already familiar with the technology, this workshop will provide you with a hands-on experience of working with Fortinet's SD-WAN & SD-Branch solution utilising FortiManager.

Course Duration

This lab should take between 8 to 12 hours to complete.
