

Wavelink Fortinet Virtual Training Labs

Prepare for your upcoming **FortiGate Administrator** certification exams with our Fortinet virtual training labs

The Wavelink enablement team — winners of Fortinet’s APAC Distributor of the Year — has created a virtual learning and training environment designed to support our partners who are preparing for their FCP - FortiGate Administrator certification exam.

The Fortinet virtual training lab has been developed to support partners with little or no experience with FortiGate and Fortinet technologies. In the virtual lab environment, participants will learn how to operate and administrate fundamental FortiGate features.

By the end of the course, participants will have acquired a solid understanding of how to deploy and maintain a basic network security solution.

Participants will learn how to:

- Use firewall policies
- Configure static routing
- Manage user authentication
- Understand the security fabric
- How to protect users using web filtering and application control
- Configure SD-WAN and verify traffic distribution
- Enable users to remotely connect to the network in a secure way
- ... Much more

These labs are available to Fortinet and Fortinet partner employees who are undertaking FCP - FortiGate Administrator (previously NSE 4 FortiGate Infrastructure and FortiGate Security) studies.

We highly recommend participants complete the online material (involves both the module recordings and study guide) and book the exam prior to undertaking the labs since this complements the studied NSE material.

Course Information

- Self-paced
- Includes two weeks of access with 20 hours of compute time
- Covers all modules within the FCP FortiGate Administrator course

Recommended

- Participants read the study guide and complete the sample exam

Eligibility Requirements

- Wavelink Fortinet training labs are open to Fortinet and Fortinet partner employees
- Fortinet customers may also be eligible pending prior arrangement
- For more information, or to confirm your eligibility, contact: training@wavelink.com.au
- Register your interest for the Wavelink NSE training labs below
