

# Fortinet FortiSASE Workshop

For professionals involved in the design, administration, and management of FortiSASE

## Benefits of Fortinet Workshops with Wavelink

Certified trainers with in-depth product knowledge and proven instructional capabilities

Courses catering to a wide range of audiences, from beginners to professionals

Fortinet NSE training labs supplemented by product-based demos

Private on-site training events and FortiGate Immersion lab available on request\*

\*Minimum student requirements apply.

## Why FortiSASE

In this FortiSASE workshop you'll gain hands-on experience in deploying a basic Secure Internet Access (SIA) solution using FortiSASE, FortiAuthenticator, and FortiClient. This workshop will guide you through essential configuration steps to build a secure and scalable network.

The course prepares you for the key topics of the FCSS FortiSASE Administrator exam. However, additional study is necessary for other topics included in the certification course. Successfully passing the exam will earn you the corresponding exam badge.

This course is part of the FCSS Secure Access Services Edge certification.

**FORTINET**  
CERTIFIED  
SOLUTION  
SPECIALIST

Secure Access  
Service Edge

## Course Content

- Set up FortiSASE as a SAML Service Provider (SP) and FortiAuthenticator as a SAML Identity Provider (IdP).
- Configure VPN policies with web filtering and security profiles for group-specific SSO.
- Implement Secure Private Access (SPA) to an existing FortiGate SD-WAN hub.
- Verify service connection health and VPN status.
- Explore advanced features like Inline-CASB and Data Loss Prevention (DLP).

## Who Should Attend

This workshop is ideal for professionals looking to demonstrate a basic deployment of Fortinet's SASE framework. Gain practical experience in secure internet access (SIA) and private access (SPA) configurations.

## What You Will Learn

- Configure SAML authentication.
- Set up VPN policies with security profiles.
- Onboard and connect an endpoint.
- Configure SPA for SD-WAN connectivity.
- Verify application control with Inline-CASB and DLP keyword blocking for ChatGPT.

## Course Duration

This lab should take between 3 to 4 hours to complete.
