

Claroty Defenders Workshop

For OT professionals looking expand their understanding on how to effectively safeguard OT and CPS systems

Benefits of Claroty Workshops with Wavelink

Our trainers will provide you with the fundamental knowledge to understand the use cases prior

Courses will aid in preparing for further education from the XCEL training program

Training is provided holistically to ensure understanding of OT integrations

Private on-site training events and follow up resources such as labs available on request

*In-Person classes subject to availability.

Why Claroty Defenders

This workshop is designed for individuals who are new to Claroty or Operational Technology as well as individuals who have been using Claroty or have been working in the Operational Technology industry for an extensive period of time and want to solidify their knowledge.

The course prepares you to understand the Industrial cyber landscape as well as the Claroty Security Platform. The course will also touch on integrations with other commonly found technology in Industrial Environments including Network Security and SOC Tools.

This course will also help prepare your fundamental knowledge for the Claroty Technical Sales Professional Exam (Both CSTP 301 and CSTP-HC) and the Implementation Engineer Exam (CIE 401).

Course Content

Learning Content

- **General Overview of the Current OT World** - Learn about What OT and ICS are, and what they look like in the modern world.
- **OT Cybersecurity Fundamentals** - Understand the basics of OT Security and how these differ from traditional IT Systems, including insider trends in the industry, the challenges found in securing these systems and common cyber frameworks used.
- **XIoT Journey to CPS Security** - Understand how to effectively secure your systems on a CPS Journey by achieving consistent asset discovery, exposure management, threat detection and Network Segmentation with Claroty's xDome Solution.
- **The Claroty Product Portfolio** - Learn about xDome, xDome for Healthcare and the on-premise solution to xDome, CTD including installation and components of operation. You'll also discuss xDome Secure Access and the trends and challenges faced with Remote Access tools and learn how the Claroty xDome SA access supports security tools.

Demo and Lab

- **xDome Demo and Lab** - Deep dive with our instructor into the xDome solution where we will discuss daily operation, adoption principles, navigation of the platform and injection of network information into the platform. We will also look at the architecture of the platform to help you understand how Claroty achieves superior CPS visibility.
- **xDome Secure Access Demo and Lab** - Gain hands on experience with the xDome SA platform to learn how to navigate the platform, and understand how the platform operates in an industrial environment.
- **Claroty xDome Healthcare Demo and Lab** - Delve into the xDome for healthcare platform to gain experience with the platform specifically designed to safeguard OT systems operating in a clinical context.
