

Honeywell Handheld Computers Training

For professionals responsible for managing, configuring, administering, and monitoring Honeywell handheld computers

Benefits of Honeywell Workshops with Wavelink

Certified trainers with in-depth product knowledge and project deployment experience

Course catered for new and experience users and administrators

Honeywell training lab based on a practical deployment

Why Attend Honeywell Handheld Computer Training with Wavelink?

This Honeywell training course is designed for super users and administrators of the fleet of handset, regardless if you have had previous hands-on experience or not.

This will cover most of the issues that you will encounter during Honeywell handset management and common troubleshooting tips, with hands-on deployment scenarios.

Best practise tips are provided to optimise the management of the Honeywell handset.

This training is the first gateway to achieving the Honeywell Performance Partner Technical Accreditation Program.
